An 1838 gold coronation medal certified as Mint State-62 realized \$16,100 as Lot 79 of this February's Torex Auction.

'Superb' 1838 Queen Victoria coronation medal captivates Torex bidders

Realizations do not include buyer's premium.

By Jesse Robitaille

A 181-year-old Queen Victoria coronation medal highlighted the recent Torex Auction hosted in conjunction with the long-running show in Toronto.

Offered by The Canadian Numismatic Company (TCNC) as Lot 79, the 1838 gold medal was certified as Mint State-62 by Numismatic Guaranty Corp. It realized \$16,100, more than

doubling its pre-sale estimate of \$8,000.

Described by auctioneers as "a superb and incredibly beautiful high-relief example," the medal was designed by Italian engraver Benedetto Pistrucci for the coronation of Queen Victoria on June 28, 1838.

"The ceremony took five hours and suffered from a lack of rehearsal," reads an article published by Westminster Abbey, which has been Britain's coronation church since 1066. "No one except the Queen and Lord John Thynne (Sub-Dean of Westminster acting for the Dean), knew what should be happening. The coronation ring was painfully forced on to her wrong finger and Lord Rolle, an elderly peer, fell down the steps while making his homage to the Queen. A confused bishop wrongly told her the ceremony was over and she then had to come back to her seat to finish the service."

Despite these mishaps, in one of her many journals, Victoria wrote of the events as being "the proudest of my life."

The obverse of the 1838 coronation medal depicts a draped bust of Victoria wearing a bandeau while the reverse depicts an enthroned

CEVNA members' research drives forward knowledge

Canadian error and variety collectors belonging to a relatively new group are championing the collecting niche that gained popularity through the '60s and '70s.

Similar to the U.S.-based Combined Organization of Numismatic Error Collectors of America – also known as CONECA – the Canadian Errors and Varieties Numismatic Association (CEVNA) is leading the charge in this country.

CEVNA first came together in 2006, at the annual convention of what was then known as the Canadian Numismatic Association (in 2008, the association received permission to use the "Royal" designation, becoming the RCNA). Since then, CEVNA has met every year at the RCNA Convention, and last year in Mississauga was no different.

"If you're collecting errors, it's always good to have a high-powered magnifying glass so

you can see them," said one of CEVNA's founders, Bill English, who suggests using a 15- to 25-times magnifier "when you really want to look close."

"For some of them you don't need a glass, but there are some things you have to look at closely to see what they actually are."

But the focus of last year's meeting, which was really more of a show and tell, was an error you don't need a magnifying glass to see.

Long-time numismatist Bill English, who's a past president of the Ontario Numismatic Association and Waterloo Coin Society, is one of the founders of the Canadian Errors and Varieties Numismatic Association.

The profound brockage has been in English's collection for decades but fell by the wayside until last summer, when he happened to look in an old box before the convention in Mississauga. It's one of many ways the knowledge base of numismatics in general develops alongside the error and variety

Newfoundland's entry into Confederation marked with commemorative silver dollar

Fifteen coins plus a five-roll collection featuring the first 2019-dated circulation coins struck at the Royal Canadian Mint's Winnipeg facility were recently released as part of the Crown corporation's latest numismatic catalogue.

Among the highlights is a \$1 Fine silver coin marking the 70th anniversary of Newfoundland becoming Canada's 10th province.

On March 31, 1949 – after years of debate about the self-governance of what was then a British dominion – Newfoundland formally joined Confederation.

The following day, prime minister Louis St. Laurent made the first ceremonial cut into the only blank stone plaque remaining over the entrance to the Peace Tower in Ottawa. The plaque was one of 10 erected in

1920 amid the reconstruction of the Parliament Buildings following a fire during the First World War.

"We are all Canadians now," said Newfoundlander F. Gordon Bradley, who accompanied St. Laurent at the ceremony 70 years ago.

Bradley, who was appointed by St. Laurent as Secretary of State, became the first Canadian federal cabinet minister from Newfoundland. He was also became the first MP for Bonavista-Twillingate, which he served until 1953, at which time he was appointed to the Senate. He died in office in 1966.

"THE CHOICE OF CANADIAN COLLECTORS"

A 'Unique' Auction House Offering 'Unique' Numismatic Material

SOME RESULTS FROM THE FEB 2019 TOREX AUCTION

SOLD FOR: \$3,123

Lot 77: United States of America; 1899 \$5 #E94775539/C, CCGS EF45. A superior example with great colors. Ultra bright! Looks better than the grade assigned. **Opening Bid: \$1,500**

SOLD FOR: \$23,205

Lot 302: 1937 \$1000 BC-28 #AK0005653, PMG Gem UNC65EPQ. Sublime example with great embossing and centering. The note is ultra bright and so attractive. You will like this example. **Opening Bid: \$12,500**

SOLD FOR: \$17,850

Lot 413: 2002 \$5 BC-62A #JHS2912607 EXPERIMENTAL NOTE. Originally produced for internal use only, this example was inadvertently released during the Official Launch of the New \$5 in March of 2002. The note has since been placed in a private collection. It has now been entrusted to us for Auction. AS PER CHARLTON REFERENCE AND THIS IS THE ONLY PRIVATELY OWNED EXAMPLE. The note comes accompanied with accurate documentation on how the note came to be in private hands as well as a signed document from the Bank of Canada confirming it's existence and it's error in issuing the note itself during the event. An extremely important find that should be considered in the highest of rarities. A once in a lifetime offer that should bring in serious attention. Once-in-a-lifetime opportunity! **Opening Bid: \$5,000**

SOLD FOR: \$10,440

Lot 157: The Bank of Montreal; 1836 \$1 (5s) #9560 CH-505-14-04-10 o/p (Payable at Quebec). Charlton Standard Catalogue 9th ed. indicates no pricing with issues only considered to be in an Institutional Collection & CPMS registry shows no documented circulation issues known. This example should be considered as a new find, possibly unique and of the highest Rarities. A solid VF example for issue that should bring alot of interest. PCGS VF25 very tiny insignificant edge tears comment is noted for accuracy. Once-in-a-lifetime opportunity! **Opening Bid: \$1,500**

SOLD FOR: \$6,960

Lot 145: The Canadian Bank of Commerce; 1935 \$5 CH-75-18-05 #A432022, PMG GEM UNC66EPQ. Rare Wedd signature. Ultra bright with full embossing. A great example of this very rare note. Best example ever handled by us. **Opening Bid: \$5,000**

SOLD FOR: \$35,700

Lot 261: 1935 \$25 BC-11 #A010276, PCGS GEM UNC66PPQ. This lovely note has great embossing and superb centering. It is brightly colored and would fit easily into the most high-end type set of any advanced collectors. An absolute knock out note! The nicest \$25 note we have handled in over 37 years. Worth a premium bid. This example may realize over estimate. This example presents an important opportunity for Registry Set collectors. Expect strong bidding. So desirable. A highlight of the 2019 February TOREX Auction. Worth a premium bid. **Opening Bid: \$27,500**

SOLD FOR: \$20,825

Lot 149: The Commercial Bank of Canada; 1860 \$2 #32712 CH-155-12-20-04 (Prescott) PCGS VF20. New Find that Charlton Standard Catalogue 9th ed. issues only existing as Proofs. An intriguing note that should be considered as possibly unique and of the highest Rarities. PCGS holder designates as CH-155-12-04P however this is definitely not a Proof note. **Opening Bid: \$1,500**

SOLD FOR: \$2,320

Lot 140: The Bank of British Columbia, 1894 \$5 Front Proof CH-501-60-2P #00000, PMG UNC64. Seldom offered, especially in this condition. **Opening Bid: \$1,000**

SOLD FOR: \$16,240

Lot 79: Great Britain; 1838 Queen Victoria Gold Coronation Medal, NGC MS62 NGC. A superb and incredibly beautiful high-relief example designed by B. Pistrucci. Obv; depicts draped bust of Victoria wearing a bandeau and the Rev; depicts an enthroned Victoria receiving her crown from Britannia, Hibernia and Scotia. This example is fully lustrous with a few minor surface hairlines; however, they effectively fade into deeply mirrored fields upon rotation. A truly radiant example commemorating the coronation of Queen Victoria. Eimer-1315, BHM-1801, 30.70gm. Similar example (same grade) sold for \$9880US in a past Heritage sale. **Opening Bid: \$6,000**

SOLD FOR: \$1,547

Lot 29: USA; 1955 1c Double Die, ICCS EF40. A popular variety. A nice example, lustrous brown. **Opening Bid: \$750**

SOLD FOR: \$5,355

Lot 770: 1916 10c PCGS MS67+. Superb gem pristine and flawless issue. Mirror like fields with just a touch of perfect greens and golds. Among the best of the best. This coin presents an important opportunity for Registry Set collectors. Expect strong bidding. **Opening Bid: \$3,000**

SOLD FOR: \$14,500

Lot 1031: 1967 \$1 Upset Die ICCS MS66. A superb Gem example full white, mirror like fields with Cameo finish. A rare example with only 7 certified examples. Without a doubt the best one seen to date. In 2016 a similar piece sold for \$15 500, definitely a superior piece that should be viewed. This coin presents an important opportunity for Registry Set collectors. **Opening Bid: \$5,000**

SOLD FOR: \$22,610

Lot 799: 1969 Large date 10c PCGS AU58. Lovely example with nice lustre. Unscratched and problem free. Among the best examples known. This coin presents an important opportunity for Registry Set collectors. Expect strong bidding. Unpriced in Trends above AU50. **Opening Bid: \$12,500**

SOLD FOR: \$11,600

Lot 724: 1874H 10c PCGS MS66. A superb Gem example Top 4 example with no better issues graded by PCGS. Coin offers sublime lustrous fields and spectacular sunset tones. An elegant example to add to the best of collections. This coin presents an important opportunity for Registry Set collectors. **Opening Bid: \$6,000**

SOLD FOR: \$3,867

Lot 499: ERROR; 1971 \$1 Strike on 25c Plan, 5,0g Brockage Obverse PCGS MS65. Elusive error coin. Rare and so desirable. Worth a premium bid. **Opening Bid: \$500**

EDITORIAL POLICY: *Canadian Coin News* is a hobby magazine endeavouring to bring worldwide numismatic news and views to its readers with the major emphasis on Canadian numismatics. Opinions expressed in signed columns, stories, and letters are not necessarily those of *Canadian Coin News*.

Auction and sales reports: *CCN* staff or assigned contributors write pre- and post-sale articles. Writers conduct interviews as needed and use information provided by the auction house as source material. As with all news articles, story selection, which sales to cover, and final placement in the magazine are news decisions made by the editor(s). Statements regarding sales are verified against prices realized. Lots that fail to meet reserve, or are bought by the consignee or their agent, are considered non-sales for the purpose of reporting. From time to time, *CCN* staff may request a copy of the invoice covering the auction transaction. Due to the public nature of auction transactions, this should not be needed often, but will be required in private treaty sales. Any information other than the price will be kept in confidence.

Attributions and values: Items attributed or values in *CCN* editorial content are offered as a service to our readers. In no way should they be construed to be an endorsement or official opinion on a specific item. Readers looking for definitive answers should seek the services of a professional numismatist. While we strive for accuracy, errors or mistakes can occur. As a matter of policy such errors or mistakes, when discovered, will be corrected in the next available edition.

LETTERS TO THE EDITOR: *Canadian Coin News* welcomes letters to the editor. Letters must be signed and include the author's address and phone number for possible verification. *CCN* reserves the right to edit or reject letters.

REPRINT RIGHTS: *Canadian Coin News* assumes that letters to any department and all unsolicited material submitted are contributed gratis and are for publication unless otherwise stated. Solicited material will be deemed accepted upon publication. Payment will be made two months following publication. *Canadian Coin News* reserves the right to edit all material submitted, solicited or unsolicited.

PRIVACY POLICY: Occasionally *Canadian Coin News* makes its subscriber list available to other reputable companies with offers of goods and/or services specific to collectors. If you wish not to be part of this service, please phone or fax us, or e-mail office@trajan.ca. You can also request a copy of our Privacy Policy, or see it online at www.trajan.ca.

Guest COMMENTARY

By Jeff Fournier

Collecting foreign banknotes need not be expensive

Have you ever considered assembling a collection of banknotes from every note-issuing country in the world?

There are presently about 180 countries, states and dependencies issuing currencies, and it's certainly a fascinating and fun-filled hobby suited for people of all ages. It's especially appropriate for youngsters, who will learn a great deal about the world's countries – their cultures, scenery, people, buildings, rulers, coats of arms, flags, languages, monetary units, politics and general economies – in a colourful, meaningful and enjoyable way.

Our hobby can offer a glimpse into the wide-ranging fabric of each country.

Collecting world banknotes lets you travel all around the world without ever leaving your own country. You can explore foreign lands and learn about the world, its wildlife, geography and people without having to spend a fortune on plane fares, hotel rooms and restaurant meals.

You can obtain foreign banknotes at most coin shows and from dealers who specialize in this area; in fact, most dealers generally have a stock of foreign banknotes, and many of them are quite inexpensive.

Second-known 1920 Home Bank \$5 note certified

Considered unique for at least 45 years, what was previously thought to be the only surviving example of the Home Bank of Canada's 1920 \$5 note is now one of a pair.

This second-known example – and the first and only in private hands – was recently certified by Paper Money Guaranty (PMG) as Choice Fine-15. It's described as "problem-free" by the third-party grading service, which adds the note "still retains much of the eye-appeal of a VF (Very Fine) note."

"It has been an incredible privilege for PMG to be entrusted with grading such an iconic piece of Canadian history," reads a statement issued by PMG this February. Heritage Auctions is slated to offer the note during the Central States Numismatic Society's 80th Anniversary Convention on April 26 in Illinois.

HOME BANK HISTORY

The Home Bank of Canada began as the Toronto Savings Bank in 1854.

There are many venues, including the National Postage Stamp and Coin Show, which will be held in Mississauga on March 23-24, the bi-annual Toronto Coin Expo and the annual conventions of the Canadian Association of Numismatic Dealers, Royal Canadian Numismatic Association, Ontario Numismatic Association and Atlantic Provinces Numismatic Association.

Importantly, all of these shows have youth tables and auctions with free or discounted foreign currency for the young collector.

As you acquire foreign banknotes – or, hopefully before – you may want to pick up a book, such as *The Standard Catalog of World Paper Money*, or perhaps do a little detective work and search the Internet for information on the subject.

As you acquire banknotes, they can be displayed in the pockets of safe plastic pages (i.e., free of acids and chemical softeners) and inserted into a standard three-ring binder for protection and easy viewing.

I would also recommend you keep a list of the notes in your collection from the start; it may not seem too important to do so at first, but as your

collection grows, you will not be able to remember every single piece you have. Tracking your collection can help you to avoid buying duplicates in the future.

Clubs are another important aspect of collecting. Of special interest to world banknote collectors is the International Bank Note Society (IBNS), which was founded in 1961. It operates as a non-profit educational organization to promote the study and knowledge of worldwide banknotes, paper currencies and all related matters along educational, scientific and historical lines. Currently, the IBNS claims more than 2,000 members across more than 90 countries.

If you want to expand your collection, you might consider including a banknote with a change in the country's name. A few examples are British Honduras (now Belize); Burma (now Myanmar); New Hebrides (now Vanuatu); or Rhodesia (now Zimbabwe).

Expanding your collection even further, you might want to include the roughly 368 countries that have issued banknotes in the past – begin collecting one banknote from each of them.

If you're interested in exhibiting your collection, the beautiful artwork on many foreign banknotes will add a lot of visual appeal to your display.

Foreign banknotes are also wonderful items to include in club displays and brochures with an aim at promoting the hobby. They also offer some very interesting topics for presenting the hobby to schools and service clubs.

Collecting foreign banknotes can be an affordable way to enjoy your hobby while adding a little bit of colour and flair. 🍁

The second-known Home Bank of Canada 1920-dated \$5 note (Charlton #365-10-08) was recently graded Choice Fine-15 by Paper Money Guaranty.

Nearly two decades later, in 1871, legislation in the federal Bank Act saw the institution become the Home Savings and Loan Co. Business flourished, and in 1903, the bank applied for and received a federal charter to become the Home Bank of Canada, which was then empowered to issue its own banknotes and extend loans.

Altogether, it had 71 branches and more than 60,000 depositors across Canada before the bank lost everything in a tale of controversy and corruption.

Headquartered in Toronto, the chartered bank issued notes dated 1904, 1914, 1917 and 1920 in denominations of \$5, \$10, \$20, \$50 and \$100. All of its notes were printed by the American Bank Note Company in Ottawa.

It's estimated only about 50 notes exist today in private hands across all denominations and dates while an additional 14 examples are in institutional holdings.

Of all the dates, the 1920 is the most rare; however, owing to the bank's relatively short lifespan, many of its notes

FEDS APPOINT NEW MASTER OF THE RCM

A new master of the Royal Canadian Mint was recently appointed by Finance Minister Bill Morneau. Marie Lemay, who has extensive experience in

public policy and served in senior leadership positions within the government over the past two decades, was appointed to a five-year term. The order-in-council authorizing Lemay's appointment listed her annual salary range between \$271,000 and \$318,800, and her first day was Feb. 18. "Her background in public policy and substantial experience in providing strategic advice and making decisions on complex and sensitive issues make her an ideal fit for this important role," said Morneau. "I am certain that the Mint will benefit from the breadth of her expertise, and I wish her great success in her new position." Lemay is leaving her post as deputy minister of Public Services and Procurement Canada, for which she was the top bureaucrat working on the problem-plagued Phoenix pay system. A Senate finance committee estimated it would cost the feds \$2.2 billion to fix the system by 2023, reports *The Globe and Mail*. The federal government pledged an additional \$431 million in the 2018 budget to fix it (with \$16 million reserved to begin replacing the troubled system). Lemay succeeds interim president and CEO Jennifer Camelon, who was at the helm of the Mint since last summer, when Sandra Hanington suddenly resigned three years into her five-year term, citing the need for a better work-life balance. The order-in-council for Hanington's appointment in 2015 listed her annual salary between \$306,300 and \$359,300.

Long-time Canadian numismatist, exonomist and auctioneer Geoffrey Bell is slated to speak at the Sixth Annual Northern California Numismatic Seminar this September. A New Brunswick resident, Bell will highlight "some aspect" of numismatics with a transportation design or story, tying in with this year's seminar theme, "Transportation Numismatics." "In the past five years, NCNA has made its annual seminars a major informative and interesting presence in organized numismatics – not just in northern California, but a presence enhancing numismatic enlightenment," said NCNA President Lloyd Chan, who's also a director with the Canadian Association for Numismatic Education. "The 2019 seminar adds to one's numismatic edification and enjoyment." Sponsored by the Northern California Numismatic Association (NCNA), the free one-day, four-speaker seminar will be held Sept. 14 at the Vallejo Naval and Historical Museum in downtown Vallejo, Calif. In addition to Bell, who's the founder of Geoffrey Bell Auctions, the seminar's speakers include: Kyle Lubke, a 24-year-old numismatic dealer; Matthew Malvini, a 19-year-old coin enthusiast; and Jeff Shevlin, a dealer of "So-Called Dollars."

on April 8, and the winners will be drawn on April 30. There will be eight major prize winners – one for each Australian state and territory – and 250 minor prize winners. Winners will be announced on May 14, which is the 35th anniversary of Australia's \$1 coin. "The need to collect is as old as humanity and transcends time and culture," said MacDiarmid. "Australia's Dollar Discovery is a nationwide treasure hunt that we hope encourages Australians of all ages and from every state and territory to check their change for these special coins." For more information, visit dollardiscovery.com.au.

NATIONWIDE COIN HUNT BEGINS 'DOWN UNDER'

Now in its fifth month, "Australia's Dollar Discovery" is the first-ever national coin hunt in the "Land Down Under." As an introduction to numismatics, the competition launched last November and encourages people to find some of the three million \$1 coins marked with the letters A, U and S and released into circulation last year. Everyone who finds all three marked examples will be entered in the draw for the "major prize," according to the competition website. "At a time of growing intangibility, the Royal Australian Mint is delighted to launch a program to encourage a whole new generation of collectors both young and old, who will not only collect these coins but also be reminded of the value of a dollar," said CEO Ross MacDiarmid. The competition closes

The Anti-Counterfeiting Educational Foundation (ACEF) is now seeking nominees for its third annual Alan Kreuzer Memorial Award, which honours people who have actively fought against counterfeit coins, banknotes or third-party encapsulation holders in the past year. The award is named after the late Alan Kreuzer, a California-based coin dealer who was instrumental in alerting the hobby to help identify counterfeit third-party certification holders and fake insert labels. After his death in 2016, his daughter, Chandra, donated \$50,000 USD to help establish the Anti-Counterfeiting Task Force, which is now part of the ACEF. "This award is a prestigious honor to recognize the vigorous anti-counterfeiting efforts of collectors, dealers, law enforcement agents or others who are diligently trying to protect the numismatic marketplace," said ACEF Executive Director Robert Brueggeman. "Previous recipients have included individuals who helped catch counterfeiters or identified suspects selling fakes, or significantly helped combat counterfeiting by generously donating to the foundation." The deadline for nominating a candidate for the 2019 Kreuzer Award is May 31. Send the nomination to info@acefonline.org with the nominee's full name, title and business affiliation and contact information as well as the reason he or she should be considered for the award. The 2019 award will be presented during the Professional Numismatists Guild awards banquet on Aug. 12 – the eve of the American Numismatic Association World's Fair of Money in the Chicago suburb of Rosemont, Ill.

NOMINATIONS OPEN FOR ACEF AWARD MEDAL

'Theodosius the Great' final emperor to rule both halves of Roman Empire

Ancient MONEY

By Stanley Clute

In or about the year AD 346, a baby boy was born in Spain to Count Theodosius, a Roman general who later saved the province of Britannia from barbarian invaders.

The infant was given the name Flavius Theodosius and would grow up to become – like his father – a great general. In 368-369, he accompanied his father on his British expedition, and half a decade later, he saved the province of Moesia from an insurrection by the Quadi and Sarmatians.

His father Theodosius the Elder was executed in 376 possibly on the orders of Valens, the emperor of the eastern provinces.

The younger Theodosius retired to a quiet life. In 377, his wife Aelia Flaccilla bore him a son whom they named Flavius Arcadius.

Following the Roman defeat and the killing of Valens by Goths at the Battle of Hadrianopolis in August 378, Theodosius was recalled to active service by the emperor Gratian, who directed him to take command of the Illyrian army early in 379. Valens had no successor so Gratian elevated Theodosius to the post of "emperor of the east."

The new emperor, who is known to history as Theodosius I (sometimes called Theodosius the Great) set about reorganizing the army at Thessalonica and then began to engage the Gothic invaders. Through a combination of military prowess and diplomacy, Theodosius managed to overcome this threat to the empire.

In 383, Theodosius elevated his young son Arcadius to the imperial purple.

The same year Magnus Maximus (known in Welsh legend as Maccsen Wledig) revolted in Britannia and the emperor Gratian was murdered. The following year, Aelia Flaccilla gave Theodosius a second son who was named Flavius Honorius. They also had a daughter called Aelia Pulcheria.

Both Aelia Pulcheria and Aelia Flaccilla died in the year 385.

In 388, Theodosius defeated Magnus Maximus and his son Flavius Victor, who were then executed. He restored rule of the western part of the empire to Valentinian II, the younger son of the emperor Valentinian I and half-brother of Gratian.

In 389, Theodosius celebrated a triumph at Rome and stayed in that city for the next two years organizing the administration of Italy.

In the spring of 392, the young emperor Valentinian II was murdered on the orders of his own general Arbogastes, who then set up a puppet emperor called Eugenius. Said to be from a good family and a teacher of grammar, Eugenius was completely under the thumb of Arbogastes.

In September of the year AD 394, Theodosius' forces met and defeated those of his rival in battle.

Eugenius was slain. A few days later Arbogastes, by then a fugitive, committed suicide.

In the meantime, Theodosius had elevated his younger son Honorius to the rank of emperor in 393.

The gold, silver and bronze coins of Theodosius I depict the Roman emperor's diademed, draped and cuirassed bust and the legend 'D. N. THEODOSIVS P. F. AVG.' on their obverses (left).

During his brief reign, the usurper Eugenius issued gold, silver and bronze coins from a number of mints, all bearing his portrait and the legend D. N. EVGENIVS P. F. AVG. on the obverse.

Having consolidated his rule over the entire Roman empire, Theodosius I died a few months later of dropsy on Jan. 17, AD 395.

THEODOSIUS ISSUES

The gold, silver and bronze coins of Theodosius I bear the emperor's diademed, draped and cuirassed bust and the legend D. N. THEODOSIVS P. F. AVG. on their obverses.

Those issued in the name of his wife Aelia Flaccilla have the obverse legend AEL. FLACCILLA AVG. and her portrait draped and with an elaborate headdress and a necklace on their obverses.

Following the death of Theodosius I, his two sons divided the empire between them. Arcadius, the eldest, took the eastern part and Honorius got the western portion. Lacking their father's military and administrative abilities the two weak emperors were con-

stantly under the influence of "favourites."

Relations between the two courts were strained throughout Arcadius' lifetime as the strongest personalities on both sides struggled for power.

Arcadius married Aelia Eudoxia, daughter of Bauto, general of the Franks, in 395. Within that decade, they had a daughter named Aelia Pulcheria.

In 401, Eudoxia gave Arcadius a son. The infant was made an emperor in January 402 while still less than one year old. He is known to history as Theodosius II.

Arcadius first came under the influence of the praetorian prefect Rufinus until that individual was murdered at the end of the year 395. He was then guided by the eunuch Eutropius, who was executed in 399.

In the period 399-400, the Goth general Gainas tried to gain control in the eastern capital of Constantinople but failed after six months.

From this time until her death in 404, the empress Eudoxia exercised great control over her husband. After the death of his wife, Arcadius

came under the control of an official named Anthemius.

Arcadius died at Constantinople on May 1, AD 408, and was succeeded as emperor of the east by his son Theodosius II, a child of seven years.

The praetorian prefect Anthemius assumed the regency, but in 414, Aelia Pulcheria was made an empress and took over those duties on behalf of her younger brother. Even after Theodosius reached his majority, Pulcheria remained effectively the ruler. During most of this reign, the eastern portion of the empire remained comparatively peaceful.

In his later years, Theodosius was troubled by incursions of the Huns and had to sign several humiliating treaties with Attila. He died at Constantinople in the summer of AD 450.

After ruling the eastern empire during most of Theodosius' reign, Pulcheria chose his successor, the senator Marcian. She passed away in the summer of 453. Notably, she left all her belongings to the poor.

is pleased to announce the sale of the largest specialized collection of coinage for the French Colonies of North America ever to appear at auction, in conjunction with the Toronto Coin Expo, May 2 and 3, 2019

Nearly 500 individual coins, covering the entire range of French coinage struck for, or used in, colonial North America. This catalogue will become a reference work for this underappreciated series, and the sale will be of interest to collectors in Canada, France, the United States and the Caribbean Islands. Reserve your copy now!

Highlights of this collection include:

- The extremely rare 1641 Quinzain, and the 1658 Sizain and Douzain pattern issues – struck in silver as piedforts.
- Over 125 different fleur-de-lys counterstamps struck on billon coinage in 1640 – the largest offering ever at auction, including types not known to Robert A. Vlack as well as a wide variety of different host coins, some extremely rare.
- Over 100 of the 1692-1705 “Recoined Sols,” also the largest offering ever, by date and mintmark, including many issues not previously known to exist.
- Over 200 of the Sous Marques and Half Sous Marques, including extremely rare varieties and mints, as well as some unknown to Vlack.
- An offering of John Law copper coinage, over 70 varieties including unlisted overdates.
- An extremely rare John Law gold issue.
- Over 40 West Indies issues, including unlisted and extremely rare varieties.
- An unlisted 1789 Cayenne 2 Sous struck in piedfort, ex Brand and Norweb collections.
- An offering of overlooked issues that were important to early Canada, such as the 16 Sols de Strasbourg (including the unverified 1715), the copper D’Ardennes coinage, and silver coinage from the treasure ship *Le Chameau*.

19th-century Canadian token has U.S. connection

Colonial TOKENS

By Tim Grawey

The numismatic links between Canada and the U.S. were, perhaps unsurprisingly, strong throughout the 19th century, owing to the two countries' shared border and intertwined past.

This relationship is especially apparent with the fascinating series of blacksmith tokens.

"Previous to 1837, when the lack of specie caused copper change to be accepted in bulk, there lived in Montreal a blacksmith of dissipated habits," wrote numismatist R. W. McLachlan in the April 1885 edition of the *American Journal of Numismatics*.

"He prepared a die for himself and when he wished to have a 'good time' he struck two or three dollars in these coppers and thereby supplied himself with sufficient change with which to gratify his wishes."

McLachlan said these details were related to him by

his mother, who was living when the coppers were produced and could recall the tokens as well as the blacksmith who struck them.

Despite this, the identity of the blacksmith was never established.

Today, it's generally accepted there was more than one location – possibly in Upper Canada (present-day Ontario) – striking the coppers.

While McLachlan is credited for coining the term "blacksmith tokens," later work by Eugene Courteau and Howland Wood recorded 46 crude counterfeits allegedly struck by the Montréal blacksmith.

"The dies in all cases crudely cut, were, in many instances purposely left unfinished, so as to give the issue the appearance of a worn coin," wrote Wood. "Although they thus produced a rude coinage those early Ca-

nadian coiners showed considerable skill in so making fresh coins bear the appearance of an old worn out but still legal currency that they were able to circulate vast quantities of these spurious imitations."

While these copper and brass pieces were initially imitations of British halfpence, they expanded to include imitations of Canadian-issued tokens and U.S. "hard times" tokens.

One peculiarity of this series is the designs often face in the opposite direction of their prototypes. This was credited to the lack of knowledge of the die sinker, who cut his dies to face the same way as the coins he used as models.

While he acknowledged

there was no direct evidence to support his claims and admitted it was difficult to determine the tokens' exact date of issue, Wood assigned what he termed the copper "head to the left series" as the first group.

This was followed by the brass tokens, including the "Harp and Tiffin" counterfeits, which he claimed were struck between 1825 and 1830.

The third group, which includes U.S. "hard times" counterfeits, were issued between 1830 and 1840. Many of these examples were muled with U.S. store cards, many of which were produced by Benjamin True, of Troy, N.Y.

The first record of True was in 1835, leading Wood to conclude it "must have been a few years later, at least, that the discarded die found its way into Canada. The scarcity of these pieces and of those with the eagle show that they were issued in limited numbers, probably caused by the growing tendency to reject all light weight coins. These eagle coins probably represent the last attempts to inject the Blacksmiths into the circulating medium of Canada."

AUCTION RESULTS

An example of this Canada-U.S. connection crossed the block during last year's sale of the Doug Robins Collection of Canadian Tokens by Heritage Auctions.

Lot 29345 of the April 2018 sale offered a Wood #6 blacksmith token struck over a U.S. half-cent.

Summarized from Wood's article, the blacksmith obverse illustrates a bust of George III to the left in cuirass. The mouth is slightly open with a prominent Adam's apple and double hair bows both pointing upward. A hump on the shoulder is prominent. The re-

A Wood #6 blacksmith token struck over a U.S. half-cent realized \$3,360 (including buyer's premium) as Lot 29345 of the April 2018 sale of the Doug Robins Collection of Canadian Tokens. Photo courtesy Heritage Auctions.

verse portrays a harp with 10 strings. The breast of the female is larger than his #5, and the edge is plain.

This die later became broken, and the cracks show distinct wear in three places. It comes with both thick and thin flans.

According to Wood, this variety is also found with the rusty obverse die and the cracked reverse die. Specimens are also known with the cracked reverse die only (the other side being blank).

This piece sold for \$3,360 (including buyer's premium).

UNDERTYPE CHARACTERISTICS

The host (or undertype) onto which the blacksmith was overstruck, the U.S. half-cent was issued from 1793-1857.

The exact date of this undertype cannot be discerned; however, during this period, many U.S. coins circulated in the Canadian colonies alongside other foreign coins due to a shortage of coinage. This particular copper half-cent was a convenient recipient to be overstruck.

From 1793-1857, depending on the year of issue, the U.S. half-cent ranged in diameter from 22 millimetres to 23.5 mm and in weight from 5.44 grams to 6.74 grams.

The original half-cent obverse features a portrait of "Liberty" facing left with a wreathed reverse and the words "HALF CENT" on two lines inside the wreath. The words "UNITED STATES OF AMERICA" are stamped around the rim, and the caption "TWO HUNDRED FOR A DOLLAR" is stamped on the edge.

Throughout its issuance, this design saw several revisions, including the direction "Liberty" faces and the style of wearing a liberty cap or having a draped bust, turban head or braided hair. ♣

Theodosius...

Continued from page 8

recognized by the obverse legend D. N. ARCADIUS P. F. AVG. around his radiate, draped and cuirassed bust.

Those of his wife Aelia Eudoxia usually have the legend AEL. EVDOXIA AVG. and her diademed and draped bust facing right.

The long reign of Theodosius II produced gold, silver and base metal coinage. The most common obverse legend is D. N. THEODOSIVS P. F. AVG. His portrait appears on the obverse. Coins were also produced for his sister Aelia Pulcheria. They can be recognized by the legend AEL. PVLCHERIA AVG. and her diademed and draped bust facing right.

As stated above, Honorius was the younger brother of Arcadius and became emperor of the west. Like Arcadius, he was a weak and inef-

fectual ruler and was constantly under the influence of others.

First, he was controlled by his guardian the half-Vandal general Flavius Stilicho. Honorius was induced by Stilicho to marry his daughter, Maria, making the general the young emperor's father-in-law. The early years of this reign were marred by a number of barbarian attacks. Stilicho managed to save Italy but Gaul was overrun by the invaders in the winter of AD 406-407.

The year 408 saw not only the death of Arcadius in the east but also the murder of Stilicho. Then things got even worse.

By 409, the Romans were forced to withdraw their troops from the province of Britannia and abandon the island to its own fate.

The Visigoths, under the leadership of Alaric, had long had their eyes set on Italy but were constantly thwarted by

Stilicho. With the general's death, their way was cleared and the Visigoths poured in. Italy was defenceless.

Honorius had taken refuge at Ravenna. Three times the barbarians besieged Rome and finally sacked it in the summer of 410.

Alaric died later that year and was succeeded by Ataulf, who took his followers out of Italy and into Gaul in 412.

The departure of the barbarians from Italy gave the western part of the empire some recovery time under a great general named Constantius. Constantius was raised to the rank of emperor by Honorius in AD 421. We know him as the emperor Constantius III.

Honorius died at Ravenna in August, AD 423.

The legend normally found on Honorius' coins, which were also issued in gold, silver and bronze, is D. N. HONORIVS P. F. AVG. His portrait is usually a diademed, draped and cuirassed bust. ♣

Final chapter on test token 'die break' yet to be written

Errors & VARIETIES

By John Regitko

I am somewhat surprised: after 257 previous columns, the highest number of emails I received on one topic has to do with a test token – not a coin – produced by the Royal Canadian Mint.

I wouldn't even call it an error per se because it was released with the Mint knowing full well it contained a major die break – at least in my opinion.

A number of people sent me scans of their test pieces containing the die crack. I am showing the one submitted to me by Bill M. because there is no glare.

According to the Mint, this token is one of five actual trial pieces used to test new technologies.

If a defect appeared during the press run of 10,000 pieces, they might have let the press continue to run and used the defects in the sets; however, because there is no way this die break could occur if left to its own devices, it begs at least one question.

Was the gouge – not the die break – intentionally added by someone?

This would require a press operator to stop the press, remove the die, cut a rather

deep groove into it and reinstall it.

I cannot see the benefit of doing this either surreptitiously or with the knowledge of people in charge. What would be gained in any test of technology to do so?

After examining a couple hundred test token sets (thanks to Kitchener, Ont.'s Colonial Acres and others), one thing strikes me as being not just highly unusual but impossible to believe. While the die was used to strike a perfect token one moment, when the next blank was struck, it contained a major die break across the whole face of the die.

I have seen hundreds of different die cracks of all descriptions on different dates and denominations, and there is always evidence of progressive deterioration.

Without an iota of deterioration over thousands of strikes, let me present two alternate possibilities that make more sense than an instant die deterioration without becoming progressively worse.

After the Mint created the master die, what would prevent them from creating at least two working dies?

Illustration 1. Shown above are close-ups of Bill M.'s token, which was illustrated in the author's previous column highlighting the major die crack found on one of the Royal Canadian Mint's test tokens. Photos by Charlton Press.

One of the dies would produce normal strikes while the second die, this containing the groove right from day one, produced tokens containing the constant die break.

Note I use the word "groove" because there is no guarantee it was actually a die break.

Coins produced at the Mint are struck by hundreds of working dies, and not all dies are perfect as is evidenced by the many constant die varieties listed in the Charlton catalogue, in Hans Zoell's catalogues and in these columns.

Some of these involve re-engraving, such as the George V five-cent pieces with the back and head of the beaver containing an extra line or the 1950 \$1 coin with the extra line that is known to have been added (albeit badly) by an engraver. Both of these are shown in Illustration 2.

Although this was not the case with the test token, constant die varieties could occur due to over-buffing. This occurred during the 1990s and earlier, when the dies were not coated with the same long-life material as today but were "refreshed" by buffing.

One of these well-known die varieties – the so-called "Bald Beaver" – is shown in Illustration 3.

There are numerous degrees of baldness known on these coins. When you consider hundreds of working dies were used to strike five-cent coins in any given year – and if each one was buffed to extend their

useful life – this would produce many variations in the unintentional baldness.

Each die struck the last coin identical to the first coin because the difference in the variations of the baldness was produced by different dies.

Why could this not also be the cause of the two types of test tokens?

trix die. When the design from the matrix was transferred to the working die, the gouge would have come out raised. When the working die struck the blank planchet, the gouge would have been incused on the coin.

This might explain the gouge we have assumed was a die crack.

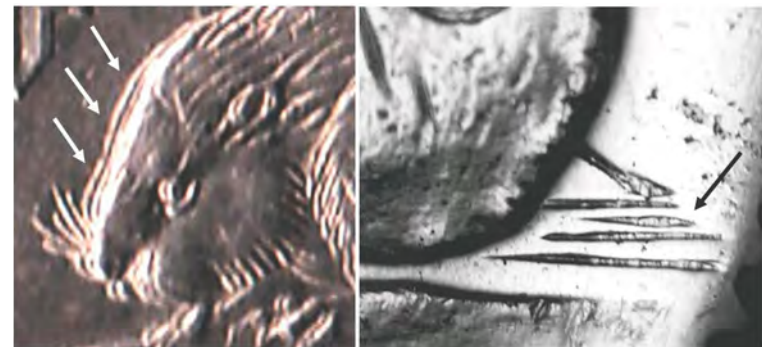

Illustration 2. The re-engraving of working dies produced constant variations.

WORKING DIES

Let me throw out another theory for you to consider.

A master die (with a negative image) produced a small quantity of matrix dies, which contain a normal, raised image. These, in turn, produce working dies with an incused image that will impress the design onto blanks to turn out coins.

When a matrix die was placed in the holder to squeeze its design onto a chunk of steel to create a working die, could a piece of wire or similarly shaped metal have wound up between them?

A foreign object between the two objects would have created an indentation on the ma-

Since each die normally produces hundreds of thousands of strikes with one die, why would the Mint create a second working die for a test strike of only 10,000 pieces? Maybe the defect was discovered partway through the press run and another working die without any defects was created.

If this hasn't made you confused yet, let me try again.

Could the normal design of the stem of the maple leaf that runs from underneath the second "A" of "CANADA" to above the "E" of "ROYALE" cause excessive stress when the matrix die squeezes the chunk of metal that will become the working die?

The **Royal Canadian Numismatic Association**

ENJOY COIN COLLECTING TO ITS FULLEST!

It's very unlikely because there are similar designs on coins of all denominations in every year containing similar design lines (including maple leaves) where transfers – from matrix die to working die – never produced any variances.

What also puzzles me is how a die with such a deep gouge would get installed in the minting press and then strike thousands of test tokens. Because the Mint is concerned with quality, why would they include these defective pieces in the five-token test sets?

For example, Jonny G. states: "I'm writing to you today to answer your question in CCN about the test token die crack. When the crack was discovered, I asked Numicanada forum members if they own this set and which version they have. From the answer I received, the compilation shows 10 sets with cracks and 30 without. All cracks have the same look. No progression was found."

Previous write-ups in CCN caused people to either go back to their local postal outlet or roll the dice and place another

set found by Colonial Acres and a source out west was the opposite, and I'm sure the Mint does not have the numbers.

Therefore, the marketplace will have to decide what people are willing to pay or sell one or the other for.

PACKAGING NUMBERING

Tim H. e-mailed: "I ordered 2 sets directly from the mint. When I checked the numbers on the write-up inside the packaging, I find the numbers are consecutive. I have numbers 7327 and

numbers both with and without a die break to be much better than consecutive serial numbers on paper money.

Also, how much would you pay for a set with a packaging number of "00001" or "10000"?

Paper money collectors would kill for a note with a low or high serial number of "0000001," "9999999" or the elusive "10000000"?

OTHER VARIETIES

Do other errors exist in the set of five test tokens?

It might come as a surprise if there are – contrary to what we've seen so far – variations of the die crack on the test token.

Mark S. e-mailed: "I ordered the set from the mint shortly after its release. The set I have does have the die crack and the mint number is 245/10,000. The copper side of the token also has a dark, almost black ring of some residue close to the steel outer ring."

I hope to show photos of Mark's test token in a follow-up column.

Robin Z. purchased two from Colonial Acres at two different times with packaging numbers 05836 and 09357. Referring to the interview with Colonial Acres co-owner Kirk Parsons published by CCN in December (Vol. 56 #18), Robin states: "My die break set, compared to the illustration in CCN, is closer to the E and past the N."

From Michael N.: "Per your recent column on 'RCM security test token set fails test,' here are some data points from

sets I have obtained directly from the Mint: The die crack present on all three of my coins is slightly different than the coin represented in your previous column (the illustration referred to by Michael is shown in Illustration 1). As in the illustration, my coins exhibit a die crack in rim and fields, and into the top of the leaf about 1.5 mm to the first major vein. However, the lower part of the crack extends up to the stem and jogs to the left but only up to the bottom of the leaf (i.e. it does not appear to cross over the lower boundary of the leaf). In addition, all three coins also have a 3mm die crack (or scratch) below the lower left of the leaf. My coins are still in the mylar holder in which they were distributed."

It looks like the final chapter is yet to be written if some of these emails referring to die crack differences are supported by images. I hope to receive substantiating photos for comparison, which I will publish in a follow-up column.

In the meantime, readers might want to take another look at their tokens to see if they can see slight differences in the crack compared to the example shown in Illustration 1.

If you find any differences, please send me photos so we can identify some minor progressive die deterioration or confirm if more than one working die was used. 🍁

John can be reached at errorman@look.ca.

Illustration 3. The illustrations show a normal fur line and the flat bellied beaver.

It beats me; perhaps they didn't consider selling test tokens to the public at that point and didn't want to mint thousands of additional normal pieces.

Anyway, if a matrix die develops cracks and transfers them to the working dies, I would bet the matrix die would be immediately replaced.

SCARCITY

Can we determine with any degree of accuracy how many perfect pieces and how many "die cracks" were produced in the total production run of 10,000 pieces?

Since the packaging numbers of the two types are all over the place, there is no way to determine how many sets with cracks were produced.

Mark S. stated in his email: "To figure out when the die crack started will be a challenge because most likely the 10,000 test tokens were run through the press, dumped into bins, taken to the packaging machine, and placed by hand as sets to be packaged. After packaging, all 10,000 packages were placed by hand in the mint envelopes with the numbered card. Just my thoughts."

I received emails from people who did a bit of detective work to come up with a figure.

order with the Mint, hoping to obtain one of each.

For example, I heard from Ron F.: "I have 1 set that has the die crack and 1 set that does not. I purchased both sets from the mint. I had only purchased 1 set initially but after reading that Colonial Acres Coins had noticed the die crack, I checked mine and sure enough, I had one (#04110). So I thought that probably the mint had read the article and probably checked for them because I wanted one without the crack, so I ordered another and it came without the crack (#05198)."

Well, Ron, you were lucky to get one of each – something that occurred to three other collectors I spoke to.

At that stage, I doubt the Mint would have opened thousands of envelopes and destroyed the contents or ripped the packages open to remove the other four tokens for re-packaging after striking some additional normal replacement tokens.

I also heard from Basil A., Ken B., Brian B. and Jerry R., who also confirmed the numbers are all over the place and the die cracks are identical to the photos published in CCN.

I mentioned in a previous column the numbers of each

7328. Number 7327 has no die break, and 7328 has a die break."

It's too bad the numbers aren't production numbers, which would mean Tim had the best pair of sets, these with the switchover numbers, which would increase the value of both sets together drastically.

However, because they're simply packaging numbers, this is not the case.

As a matter of fact, Michael N. also has consecutive numbers of each type. His #03139 does not have a die crack while his #03140 does.

Johnny G. also reports one of the members of Numicanada has two consecutive sets (#07618 and #07619) with and without cracks.

Notaphily enthusiasts collect unusual serial numbers on paper money.

Would you pay more for the test token set if their cards showed consecutive serial numbers with both a die break and no die break in one person's hands?

Unlike paper money, which is packaged in piles of 100 with consecutive serial numbers, the test tokens were – obviously – packaged helter-skelter. Therefore, I consider a set of two consecutive packaging

57th annual ONA Convention medal to be issued

Numismatic FRINGE

By Jeff Fournier

The Ontario Numismatic Association (ONA) will issue a medal to mark their 57th annual convention, to be held April 12-14 in Kingston.

The medal design was chosen by the convention committee from a concept submitted by Kingston Numismatic Association member Michael Platt. The medal features Kingston City Hall circa 1867 on the obverse and the ONA logo on the reverse.

It was struck in a beautiful, heavy cameo in silver (30 minted); brass (25 minted); and copper (80 minted).

One convention copper medal will be included in the \$25 registration kit package.

The medal issued for the inaugural ONA Convention, which was held in Kitchener in 1962, was the first in a series that continues to this day. Photos by Jeff Fournier.

This is an extremely interesting series to collect. Although the precious-metal award medals and base-metal issues are always produced in low quantities, they can still be obtained for a modest price if a collector is persistent.

In the early convention years, medals were usually struck in bronze, silver, gold filled and often in 10-karat gold as well. Mintages ranged from a high of 125 antiqued-bronze pieces in 1962, when more than a dozen 10-karat gold medals were also struck, to a low of 30 bronze base-metal pieces for the 1982 convention held at Toronto's former Westbury Hotel.

The ONA website has brief write-ups about these interesting convention medals, and past editions of the club newsletter, *The Ontario Numismatist*,

In 1967, the ONA Convention was once again held in Kitchener and hosted by the Waterloo Coin Society.

includes information about medal issues.

By far the most complete listing of ONA medals was published in Charlton's second edition of *Canadian Numismatic Medals*, published in 2008. This standard catalogue covers all known ONA regular, special and award medal issues along with those issued for the annual Canadian Numismatic Association and Atlantic Provinces Numismatic Association medals.

In 1971, the ONA Convention headed to Sudbury, in northern Ontario, for the first time ever.

Unfortunately, because the catalogue was last issued in 2008 – so only includes issues up to 2007 – all recent issues remain uncatalogued from that point on.

HOW TO COLLECT CONVENTION MEDALS

Most collectors of ONA medals begin by collecting the medals issued at ONA conventions they have attended.

Once they realize how beautiful and collectible the series is, they often branch out and attempt to put a complete base-metal or regular-issue set together.

The more advanced and adventurous an ONA medal collector becomes, the more inclined he or she is to embark on a quest to acquire the ONA convention precious-metal issues – and then the award and special medal issues.

In 1988, the ONA Convention was held at Toronto's Lakeshore Hotel, and once again, a medal was issued.

As noted earlier, because the regular-issue ONA medals are minted in limited quantities, these special and precious-metal pieces represent a significant challenge to any collector due to their low mintages.

An interesting sideline to collecting ONA medal issues is the formation of a collection of periphery material such as ONA auction catalogues, convention programs, wooden money, ribbons and other items emblazoned with the association's logo or issued as a souvenir of the annual convention.

Such a sideline can form the basis of a wonderful exhibit to go along with a collector's ONA convention medals. Such an ex-

In 1989, the ONA Convention was held in Woodstock but was hosted by three clubs in Oxford County. These include the Woodstock Coin Club, the Ingersoll Coin Club and the Tillsonburg Coin Club.

No ONA Convention medals were issued in 1981 or 1984, but for the 1981 convention in Niagara Falls, a small issue of one-ounce silver bars were produced.

hibit is sure to be enjoyed by all who see it.

CONTRIBUTIONS ARE APPRECIATED

Readers wishing to contact me about this column may email me at jfournier14@gmail.com, phone me at 705-491-1735 or send mail to Jeff Fournier, Fisher Street R.P.O. Box 22004, North Bay, ON P1B 9P5.

The 1992 ONA Convention was sponsored by the ONA itself. Many collectors were interested in that year's medal design due to the Canadian National Railway 'Northern' steam train depicted on its reverse.

I'm always on the look-out for information about numismatic fringe items such as medals, challenge coins, scrip or tokens issued by Canadian municipalities, coin clubs, fraternities, organizations or merchants. Please let me know if you come across any pieces that haven't

Continued on page 24

The ONA's award and recognition medals have been struck in most years since the association's formation for presentation to convention exhibitors, committee members, speakers and for the coveted ONA award of merit.

The 2019 Ontario Numismatic Association (ONA) Convention medal will be issued at this year's gathering in Kingston on April 12-14. Supplied photo.

These medals are in short supply, so if you wish to purchase one or more, you better do it soon. Visit the ONA website, the-ona.ca, for more information.

AN ANNUAL TRADITION

When the ONA held its first annual convention in 1962, another annual tradition – the issuance of a commemorative convention medal – began as well.

Each year since 1962, excluding only 1981 and 1984, limited-edition medals were struck featuring the ONA logo on the obverse and a design of significance to the local club and host city where the convention was held on the reverse.

EDWARD VII RED PREMIUMS: COMPLETELY ORIGINAL AND: 95% RED, ADD 10-30%; 100% FULL RED, ADD 30-50%

Table listing George V coins with columns for VG-8, F-12, VF-20, EF-40, AU-50, MS-60 BR, MS-62 RB, MS-63 R, MS-64 R, MS-65 R, and MS-66 R. Includes entries for 1911, 1912, 1913, 1914, 1915, 1916, 1917, 1918, 1919, 1920.

GEORGE V LARGE CENT RED PREMIUMS: COMPLETELY ORIGINAL AND: 95% RED, ADD 10-30%; 100% FULL RED, ADD 30-50%

SMALL CENTS

Table listing small cent coins (George V) with columns for VG-8, F-12, VF-20, EF-40, AU-50, MS-60 BR, MS-62 RB, MS-63 R, MS-64 R, MS-65 R, and MS-66 R. Includes entries for 1920, 1921, 1922, 1923, 1924, 1925, 1926.

In this issue, we are focusing on Canadian one-cent coins, an area of numismatics in which there are a lot of passionate collectors and dealers (and for a number of reasons).

Part of the allure of this area – especially in the Victorian issues – is the number of varieties created by re-engraving and repairing the myriad of dies, including both the obverse and reverse matrices, used to strike these coins.

Part of the difficulty in reporting Trends valuations is deciding which varieties should – and should not – be included. One might say the varieties encountered and transacted more often should be included as it's easier to determine their price levels. Others might say if a variety is the result of a recognized die change, it should be included.

Continued on page 29

Table listing George V coins with columns for VG-8, F-12, VF-20, EF-40, AU-50, MS-60 Br, MS-62 RB, MS-63 R, MS-64 R, MS-65 R, and MS-66 R. Includes entries for 1927, 1928, 1929, 1929 High 9, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1936 dot.

George V Small Cents Red Premiums (except 1933 and 1936): Completely original and: 90% Red, add 10-20%; 95% Red, add 20-50%; 100% Full Red, add 50-100%

Table listing George VI coins with columns for VG-8, F-12, VF-20, EF-40, AU-50, MS-60 Br, MS-62 RB, MS-63 R, MS-64 R, MS-65 R, and MS-66 R. Includes entries for 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1947ML, 1947ML blunt 7, 1948 A to denticles, 1948 A betw. denticles, 1949 A to denticles, 1949 A betw. denticles, 1950, 1951, 1952.

George VI Small Cent Red Premiums: Completely original and: 95% Red, add 10-30%; 100% Full Red, add 30-50%

Table listing Elizabeth II coins with columns for F-12, VF-20, EF-40, AU-50, MS-60 Br, MS-62 RB, MS-63 R, MS-64 R, MS-65 R, and MS-66 R. Includes entries for 1953 NSF, 1953 SF, 1954 SF, 1954 NSF (PL), 1955 NSF, 1955 SF, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965 sm bds, pt 5 V1, 1965 sm bds, bl 5 V2, 1965 Lg bds, bl 5 V3, 1965 Lg bds, pt 5 V4, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976.

FIVE CENTS

Table listing five-cent coins (Victoria/Year) with columns for G-4, VG-8, F-12, VF-20, EF-40, AU-50, MS-60, MS-62, MS-63, and MS-64. Includes entries for 1858 SD, 1870 Flat Rim, 1870 Raised Rim, 1871, 1872H, 1874H PI 4, SD, 1874H Cr 4, LD, 1875H SD, 1875H LD, 1880H obv 2, 1880H obv 3, 1881H, 1882H.

Victoria receiving her crown from Britannia, Hibernia and Scotia.

'NEW FINDS'

Other auction highlights, these among the paper money offerings, included two "new finds" that sold for "well above their set estimates," auctioneer Eric Paquet said.

The first example was an 1860 Commercial Bank of Canada \$2 note (Charlton 155-12-20-04) offered as Lot 149. It was certified as Very Fine-20 by Professional Coin Grading Service (PCGS), which designated the note as "CH-155-12-04P"; however, it's "definitely not a Proof note," Paquet said, adding it "should be considered as possibly unique and of the highest rarity."

It realized \$17,500, more than doubling its high pre-sale estimate of \$7,500.

the Canadian Paper Money Society registry lists no known circulated examples, Paquet said.

"This example should be considered as a new find, possibly unique and of the highest rarity," he added, of Lot 157.

From the Plate D printing and with a serial number reading "9560," this example realized \$10,350, more than doubling its low estimate of \$4,500.

\$1,000 BILLS BRING STRONG PRICES

Several \$1,000 notes brought "extremely strong prices," Paquet said, with Lot 268 hammering down for nearly \$30,000.

From the Bank of Canada's 1935 Series, a \$1,000 (BC-19) with a serial number reading "A15847" was offered in Paper Money Guaranty Gem Uncirculated-66 EPQ (exceptional paper quality).

Described by auctioneers as "simply a splendid example, one of unforgettable quality and a highlight of this sale," this example brought \$29,325, topping

A 1935 Series \$1,000 note in Paper Money Guaranty Gem Uncirculated-66 EPQ (exceptional paper quality) realized \$29,325 as Lot 268.

ample was "the best example ever handled by us."

With a serial number reading "A/K0095373," this lot brought \$13,800, topping its high estimate of \$12,500.

Rounding out the paper money highlights was Lot 413, an experimental \$5 note (BC-62A) produced by the Bank of Canada for internal use only. Inadvertently released in March 2002 during the launch of the Canadian Journey Series' \$5 note, this example has since been held in a private collection.

auctioneers as being "among the best examples known," this elusive variety brought \$21,850.

An 1892-dated 50-cent "Obverse 4" variety in International Coin Certification Service (ICCS) Mint State-64 was also offered as Lot 919.

The highest-graded example from ICCS, this lot realized \$45,000.

Rounding out the highlights was Lot 1031, a 1967 \$1 "upset die" variety in ICCS Mint State-66.

One of only seven certified examples, it is "without a doubt the best one seen to date," Paquet said.

It realized \$14,375.

The Feb. 22-27 sale kicked off TCNC's 2019 auction season "with a bang," Paquet said. Altogether, more than 2,600 lots were offered across five sessions.

"A superb variety of Canadian and world banknotes, coins, tokens and more were presented and offered to over 500 registered bidders," he added.

"As always, we must thank the numismatic community, consigners and participants in making this a successful venue," Paquet said.

The auction house's next major sales include the summer Torex Auction in June and the Royal Canadian Numismatic Association Auction in Calgary this July.

For more information about TCNC, visit canadiancoinsandpapermoney.com. 🍁

An 1860 Commercial Bank of Canada \$2 note in Professional Coin Grading Service (PCGS) Very Fine-20 realized \$17,500 as Lot 149.

The second new find – described by auctioneers as a "once-in-a-lifetime opportunity" – was an 1836 Bank of Montreal \$1 note (Charlton 505-14-04-10) in PCGS Very Fine-25.

The 2019 Charlton Standard Catalogue of Canadian Bank Notes lists no examples outside of institutional collections, and

its low pre-sale estimate of \$25,000.

Another \$1,000 note (BC-44b), this from the Bank of Canada's 1954 Series, was offered in PCGS Gem Uncirculated-66 PPQ (premium paper quality) as Lot 365.

"This note bears the scarce signatures of Beattie-Rasminski," said Paquet, who added this ex-

"The note comes accompanied with accurate documentation on how the note came to be in private hands as well as a signed document from the Bank of Canada confirming its existence and its error in issuing the note itself during the event," said Paquet, who added this is the only privately owned example.

With a serial number reading "JHS2912607," this lot sold for \$17,250, topping its low estimate of \$15,000.

COINAGE HIGHLIGHTS

"In coins, we had some pleasing and refreshing surprises," said Paquet.

Among the top highlights was Lot 799, a 1969 10-cent "large date" variety in PCGS About Uncirculated-58. Described by

A 1969 10-cent 'large date' variety in PCGS About Uncirculated-58 brought \$21,850 as Lot 799.

An 1892-dated 50-cent 'Obverse 4' variety in International Coin Certification Service (ICCS) Mint State-64 realized \$45,000 as Lot 919.

A 1967 \$1 'upset die' variety in ICCS Mint State-66 realized \$14,375 as Lot 1031.

An 1836 Bank of Montreal \$1 note in PCGS Very Fine-25 realized \$10,350 as Lot 157.

Catalogue...

Continued from page 1

With a reverse design nearly identical to Canada's 1949 silver dollar designed by Thomas Shingles, master engraver for the Mint from 1943-65, the newly issued coin also includes the double-date "1949-2019" and a Proof finish.

Shingles originally hand-carved the design in miniature on the master tooling for the 1949 silver dollar.

Like the original 1949 issue, the new \$1 coin's obverse features the effigy of King George VI by T. H. Paget.

The 2019 coin has a weight of 157.6 grams, a diameter of 65.25 millimetres and a mintage of 1,000 pieces.

GOLDEN PYSANKA

A \$250 pure gold coin, "Eternal Blessing Pysanka," honours a long-running Ukrainian-Canadian tradition with an egg-shaped piece that's the first all-gold coin of its kind.

Pysankas are Easter eggs decorated with traditional Ukrainian folk designs. The tradition – and its meaningful symbolism highlighting the rebirth of nature and the resurrection of Jesus Christ – was continued by immigrants who came to Canada from the late 19th century through the present day.

Today, Canada has the world's third-largest Ukrainian population behind Ukraine and Russia.

What's more, the world's second-largest pysanka was erected in Vegreville, Alta., in 1975 to mark the centennial of the Royal Canadian Mounted Police (the largest pysanka can be found in Ukraine).

The newly issued coin features the "most complex pysanka design yet," according to the Mint. The reverse depicts a multi-tiered wooden temple in the centre surrounded by several bands representing eternity. An inner band of dots and waves reflect Canada's motto, "A Mari Usque Ad Mare" ("From Sea to Sea"), and on the outer band, compass-like stars are paired with upended squares that represent the earth.

This coin has a weight of 58.5 grams, a diameter of 45 mm (long) by 33 mm (wide) and a mintage of 250 pieces.

'THE ELEMENTS'

A four-piece set of \$3 Fine silver coins, "The Elements," marks the first time this theme has been featured on a Canadian coin.

"This is our first exploration of a concept that was fundamental to the ancient sciences and philosophy," reads a statement issued by the Mint. "Instead of symbols, we opted for a visual storytelling approach by highlighting the impact of these forces of nature in Canada."

The set features a four square quadrants, which – when combined – complete a circular illustration of the four elements of nature in Canada. In all four corners of the completed design, maple leaves are transformed by seasonal colours of red, gold, brown and green.

Each of the four coins has a weight of 11.72 grams and a diameter of 27 mm by 27 mm. There is a mintage of 2,000 sets.

'FIRST STRIKES'

Other highlights include a special wrap roll collection entitled "First Strikes."

The five-roll set – with a mintage of 5,000 – includes all five of Canada's circulating denominations (\$50 in \$2 coins; \$25 in \$1 coins; \$10 in 25-cent coins; \$5 in 10-cent coins; and \$2 in five-cent coins).

New to this year's set is a holographic label, which seals every roll of "First Strikes."

OTHER MARCH COINS

The remaining coins in the Mint's March numismatic catalogue, which was issued nationwide on March 5, include:

- the third \$3 Fine silver coin, "Maple Syrup Tasting," from the 12-coin "Celebrating Canadian Fun and Festivities" series;
- a \$5 Fine silver coin from the ongoing "Zodiac" series for Aries, the sign of the ram;

- a \$20 Fine silver coin celebrating the 40th anniversary of the Gold Maple Leaf bullion coin;
- a \$20 Fine silver coin, "The Fox," which is the second release from the "Canadian Fauna" series;
- a \$20 Fine silver coin, "Hatching Hadrosaur," which is the Mint's first egg-shaped dinosaur coin and highlights the 1987 discovery of one of North America's largest dinosaur nesting sites, "Devil's Coulee" in southern Alberta;

• a \$100 Fine silver coin, "Canadian Maples," which gives a nod to Canada's early coin designs with the crossed maple boughs of the country's early coinage (1858-1936);

- a 50-cent Fine silver coin, "60th Anniversary of the 1959 Half-Dollar," which features a selectively gold-plated obverse effigy of Queen Elizabeth II – the same effigy used on the 1959 half-dollar; and
- a five-ounce Fine silver coin from the "Big Coin" series featuring the five-cent denomination.

niche; indeed, collectors outside the scope of CEVNA's focus can also benefit from the group's work, English said.

"Trying to explain how a brockage happens to people for the first time is sort of confusing, but when you actually look at a brockage, you know exactly how it's made."

One of many mint-made errors, a brockage occurs when a just-struck coin fails to eject, possibly becoming attached to a die and leading to a most-desirable full brockage, which produces an incused mirror image of the coin's design on any blanks subsequently struck.

"Once a coin is trapped and stays attached to a die, the coin becomes a die, so to speak, and strikes other coins," said English, who in October 1961 became one of 25 charter members of the Ontario Numismatic Association after vice-chairing the formation committee earlier that year.

English received the profound brockage from the token's producer, the Wellings Mint, in the late 1960s.

The aluminum token, which weighs about 7.3 grams and has a 40-millimetre diameter, was struck for the 1969 Kitchener-Waterloo Heritage Festival, which was a precursor to the twin cities' Oktoberfest that began soon after.

The token's reverse depicts two love birds facing each other with the words "DOUBLE GOOD LUCK" and the number "25" around the rim.

"For two years, the Waterloo Coin Society was involved in striking those medals," said English, who twice served as president of that society, which was founded in 1959 and is celebrating its 60th anniversary this year.

"Nothing was made for '72, and in '73 they started making what we call trade dollars – or municipal tokens – but we were the start of it."

The 1969 token was struck in copper as well as aluminum, the latter of which were "quite thin," said English, who's also a 60-year member of the RCNA.

"We actually ended up with three thicknesses, so some were thick and others were more thin."

SCRAP METAL

The brockage is "actually a piece of scrap," he said, adding it "must have been struck by a die because it has the design raised right up high on one side."

"What happened is this piece was struck and got stuck, and it may have fallen in with the copper blanks. Those blanks went in

while this token was stuck to the other die, and it came down and impressed on the token and stayed there."

When you see the coin in person, it's an instantly understandable explanation of brockages and how they are made, English added.

"The design on one side is flattened out because it was the die that struck into this face; if you were to put the two together, it would give you the coin as it was struck. If you turn

it over, it shows you the reverse design."

As for re-discovering the lost brockage, English said he hadn't seen the piece since it was struck by a private Toronto-based operation known as the Wellings Mint.

"I would go pick up the tokens when they were ready, and I asked them if they had any errors or anything – although I don't think we called them errors at that time – and they must have given me this thing." 🍁

A privately struck token was issued in 1969 for that year's Kitchener-Waterloo Heritage Festival, which was a precursor to the twin cities' Oktoberfest.

Home Bank...

Continued from page 6

clude collectors.

On Aug. 17, 1923, the bank's head office and main branch didn't open for business. Instead, someone placed a cardboard sign in the window reading, "Bank Closed. Payment Suspended."

Ten of the bank's officials were eventually arrested on charges ranging from fraud to authorizing false returns, and tens of thousands of Canadian farmers – and most of Toronto's Catholic community – were reported to lose their savings (there was no federal deposit insurance at that time).

Former bank president Herbert Daly, who was at one time Canada's youngest bank president, was unable to testify after a nervous breakdown. He died only a few months later, on Oct. 22, 1923.

It is likely a portion of the bank's 1920-dated notes were unissued and subsequently destroyed when the bank failed.

FIRST FAILURE SINCE 1911

The failure of the Home Bank marked the first time one of Canada's chartered banks went under since 1911, when the Farmer's Bank failed.

In 1924, a royal commission initiated by prime minister William Lyon Mackenzie King found the Home Bank's president made several questionable loans to a close family friend and other companies he and other bank directors were closely involved with.

The unpaid debts became so large the bank felt it couldn't afford to let them fail. The bank officers continued to approve additional funds, and the accruing interest on the bad loans was recapitalized into the principal, building the house of cards ever higher.

The bank's directors failed to closely examine the books and its untrained internal auditor dutifully attested to the bank's health right up to Aug. 17, 1923, when the cardboard sign notified customers: "Bank Closed. Payment Suspended."

At the time of its failure, the Home Bank's assets were estimated at \$2.7 million against liabilities of \$15.5 million.

When the bank's receiver could only recoup 25 cents on the dollar for depositors, angry citizens pressured the feds to provide an additional 35 cents on the dollar from a special relief fund for small depositors with accounts up to \$500 (no federal compensation was offered for balances above \$500). Public

outrage led to stricter government oversight of financial institutions, including the creation of the Office of the Inspector-General of Banks (known as the Office of the Superintendent of Financial Institutions since 1987).

OTHER KNOWN EXAMPLE

The face of the Home Bank's 1920-dated \$5 note features a portrait of Major General Sir Isaac Brock at the left; a seated allegorical "Commerce" portrait at the centre; and ships in the background.

The back of the note features three students ("Mutual Improvement") and the bank name at the centre.

Prior to the second-known example being submitted to PMG, the Bank of Canada's National Currency Collection housed the only known example.

The Bank of Canada's example, which is privately held in Canada's National Currency Collection, was purchased in 1974 by the collection's curator, Sheldon Carroll.

The previous owner was Charlton Numismatics, which was the largest coin company in Canada throughout the 1970s. It produces *The Charlton Standard Catalogue of Canadian Bank Notes*, which lists this note as #365-10-08. 🍁

ONA heading to Kingston for 57th annual convention this April

By Jesse Robitaille

After three consecutive years at the same venue in Kitchener, the Ontario Numismatic Association (ONA) is heading across the province to Kingston, where its members will meet this April for the group's 57th annual convention.

This year's convention – to be held April 12-14 – will mark only the second time the ONA's annual gathering has been held in Kingston, which last played host to the association in 2010.

"It's been nine years, and the mandate of the ONA is to service the province of Ontario, so we needed to move around," said convention co-chair Robb McPherson, who's also the ONA's treasurer and past president.

"The dealers and the ONA's members were ready for a change, so we listened. But we expect everyone to fulfill their end of the deal and come out to the show this April."

A more convenient location for members living in eastern Ontario, Kingston will also serve as a hopeful host city for members who are "looking for a change," said co-chair Lisa McPherson, who's also the ONA's first vice-president.

"We have people that come to every convention – it doesn't matter where it is – and a lot of that is for the camaraderie. Sitting down and discussing your hobby in person – and physically showing people your pocket pieces – is always fun."

FOUR-SPEAKER SYMPOSIUM

Among the show's highlights is its highly touted educational symposium, which is organized by ONA President Scott Douglas, who's also the association's education chair.

"It is my hope that everyone will attend what is sure to be an informative look at our world of numismatics," said Douglas, who added the symposium will kick off April 12 at 1 p.m.

"From education we gain knowledge. With knowledge we gain wisdom."

The symposium's four speakers include:

- Chris Boyer, a Fellow of the ONA, who will give a presentation on the numismatics of the Royal Canadian Mounted Police at 1 p.m.;
- Steve Woodland, also a Fellow of the ONA, who will give a presentation on Canadian numismatist and token specialist Ludger Gravel at 2 p.m.;
- Robert Frisch, who will give a presentation on polymer banknotes at 3 p.m.; and
- Boyd Laanstra, a senior analyst with the Bank of Canada's visual content currency department, who will highlight the design process for Canada's recently released vertical \$10 note at 4 p.m.

In keeping with the show's family-friendly vision, there will also be a youth table set up on the bourse.

A "Coin Kids" auction will also be held on April 13 at 1 p.m., when budding collectors are invited to bid on a range of numismatic items using play money provided by organizers. There is no cost to participate; however, parents are asked to accompany their children throughout the three-hour auction.

2019 CONVENTION MEDAL

The design for this year's convention medal was chosen by the organizing committee from a concept submitted by Michael Platt, who's a member of the Kingston Numismatic Association.

The medal features Kingston City Hall circa 1867.

The 2019 Ontario Numismatic Association Convention will be held April 12-14 at the Ambassador Hotel and Conference Centre in Kingston, Ont.

CONVENING SOCIETIES AND YOUTH PROGRAM

There will also be several national numismatic organizations meeting at this year's convention.

These include:

- the Canadian Tire Coupon Collectors' Club on April 13 at 9:30 a.m.;
- the Canadian Association of Token Collectors on April 13 at 1 p.m.;
- the Canadian Centennial Collectors' Club on April 13 at 2:30 p.m.;
- the Canadian Association of Wooden Money Collectors on April 13 at 4 p.m.;
- the Canadian Association of Numismatic Editors and Writers on April 14 at noon; and
- the Canadian Association For Numismatic Education on April 14 at 12:30 p.m.

After the city's original town hall was destroyed by fire in 1840, architect George Browne was commissioned by mayor John Counter to design a new building reflecting the city's status as the provincial capital.

The new city hall was completed in November 1844 – six months after the seat of government was moved to Montréal – and is today designated as a National Historic Site.

"This building, one of the most ambitious examples of nineteenth century Canadian municipal architecture, was completed in 1844 at a cost of almost £20,000," reads a plaque erected at 216 Ontario St., the site of Kingston City Hall. "It housed the municipal offices, the council chambers, and the town market, and also contained shops, other offices, and a saloon."

Trends...

Continued from page 16

For decades, CCN has included four 1859 date varieties and three 1891 date varieties.

It is only in the last few years these pages have reported prices for an expanding number of date varieties and other obverse and reverse varieties.

I have been asked to include more, but I think it's incumbent upon us at CCN to review what we include now and what – if any – should be added later.

I would encourage all collectors, dealers and students of these issues to send a letter or email to CCN if you have any suggestions of what should be added or removed from these pages.

THE 'RED FACTOR'

The other fun area of the one-cent issues is the "red factor," which is the determination of how much "red" lustre remains on Mint State (MS) issues and how to quantify it.

The grading services use this terminology to make a determination about whether the lustre is "brown," "red-brown" or "red" (the lustre tends to be more orange than red, but these are the terms used). Different grading services have different views of what the dividing line is between these determinations, but collectors are increasingly using their dollars to determine how much "red" is red.

Certain dates have manufacturing characteristics, in which the colour of the lustre

varies depending on the mint that struck them and how they prepared the planchets before striking. These nuances can result from the fact particular dates display different colours for "red" coins.

This is particularly evident with 1944 small cents, some MS examples of which display wine-red lustre while others are more orange. The wine-red lustre tends to be more subdued, resulting in more red-brown designations.

True red Gem 1944 cents displaying 85 per cent or more red lustre are rare.

Judging by the recent action for one-cent coins, especially in the Victorian and Edward dates, it is obvious collectors are willing to pay a higher percentage of *Trends* for coins that are at least 85 per cent red.

The most interest is in coins displaying 90 per cent red or more.

As such, I have changed the minimum percentage for coins to qualify for Choice and Gem red prices. The minimum is 70 per cent to 75 per cent, depending on the grade. Coins in the 60 per cent to 65 per cent range should trade at prices 25 per cent to 35 per cent below these levels, especially if graded MS-64 or MS-65 and designated red.

There are no actual price changes in this issue. The market is steady aside from the caveats I already mentioned.

This issue should be in your hands as winter turns to spring, so I wish you warmer and sunnier days ahead! 🍀

Silver and brass versions of the 2019 convention medal are in shorter supply this year with a mintage of 30 and 25 pieces, respectively. The copper version will have a mintage of 80 pieces.

2019 SHOW DETAILS

This year's ONA Convention will be held at the Ambassador Hotel and Conference Centre on 1550 Princess St. Daily admission is \$3 (or \$15 for the three-day "early admission" floor pass) while children under the age of 17 are free.

The bourse will be open on April 12 from noon-6 p.m.; on April 13 from 10 a.m.-5 p.m.;

and on April 14 from 10 a.m.-1 p.m.

Surrounded by the Marshland Conservation Area, the hotel is only minutes away from many of the city's attractions, including the Kingston Penitentiary, Fort Henry National Historic Site and the Bellevue House National Historic Site, which was the former home of prime minister Sir John A. Macdonald.

"Kingston is an exciting and historical place, and I know it will leave a favourable impression on everyone," said Douglas.

As of early March, bourse tables were still available for interested dealers. For more information, contact bourse chair Sean Sinclair at bourse2019@the-ona.ca. 🍀

SHOW & Bourse

Visit www.canadiancoinnews.com/events for the full list of shows posted to date
